INDEPENDENT INSPECTION AND AUDIT REPORT

Our Ref: MI3561B
Client Ref: Gold Audit September 2025
Date: 19th September 2025

HAN*etf*
City Tower
40 Basinghall Street
London
EC2V 5DE

In accordance with instructions received from HAN*etf* we have performed an independent audit of the Gold Bars captioned below and our findings are as follows:

Material : A total of 89 GD gold bars produced by LBMA Good Delivery Refiners
Client's Ref : Royal Mint Currency Hedged Physical Gold ETC Audit September 2025.
Audit Date : 17th September 2025.

RESPONSIBLE SOURCING OF BARS AND PROVENANCE

We can confirm at the dates of the audit that all gold bars:

- Conformed to LBMA Good Delivery requirements.
- A total of 100% (89 bars) were produced post 2022.
- Were, 100% (without exception) part of the LBMA's Responsible Gold Sourcing Standards
- 21.35% (19 bars) were produced from recycled gold.

QUANTITY

A total of 89 x 400 Troy Oz (approx.), Standard LBMA Good Delivery gold bars.
All bars were produced by approved LBMA refiners.

BAR MARKS/ DESCRIPTION OF BARS

The 89 Standard Good Delivery bars were stamped in accordance with LBMA specifications and were in a good, clean sound condition.

STORAGE

The 89 bars were stored in a secure vault and were contained on a total of 3 pallets. The bars were safely stacked in layers.

INSPECTION

During the audit, each bar was inspected, and the marked data compared with the submitted bar lists. Each serial number, refinery cast mark, fineness and year of production was recorded and compared with the advised lists. The total quantity of bars was found to be correct, and all bar marks agreed with the bar lists.

CHECK WEIGHING

As agreed with all parties prior to the audit, approximately 5% of the bars were randomly chosen from each pallet for check weighing. A total of 6 bars were therefore check weighed on a certified Sartorius digital load cell balance weighing to a maximum of 14.200 Kgs x 0.01 Gms with a conversion to Troy Ozs. The balance was officially calibrated on 19th September 2024 with the next calibration due in September 2025.
Gross weights on the advised stock bars were shown in Troy Ozs. Prior to commencing the check weighing operations, the balances were checked with calibrated /certified weights and were found to be functioning accurately. The ascertained check weights for the 6 bars confirmed the advised gross weight and were within the LBMA accepted weight tolerance
