YieldMax™ UCITS ETFs

Investment Opportunity

The YieldMax™ Opportunity

YieldMax™ UCITS ETFs are groundbreaking exchange-traded funds that actively manage an investment strategy typically reserved for sophisticated options traders: the covered call strategy. The covered call strategy is a widely-used ***income strategy*** that uses exchange-listed options to harvest income from the volatility of a stock , including stocks that offer small or no dividends of their own, such as Tesla, NVIDIA, Coinbase, Google, Meta, AMD, Apple, Microsoft, and many more.

> “ Harvest income from the volatility of a stock.

YieldMax™ ETFs are designed to make monthly cash distributions to income-seeking investors. Any income received can be automatically reinvested into the ETF to benefit from the effects of compounding. Compounding can make your investment grow faster over time.

> “ Designed to make monthly cash distributions.

Why Choose YieldMax™?

- **Monthly Income:** Potential to earn income from companies that traditionally do not pay dividends.
- **Convenience:** No need to manage multiple options positions; get exposure to a portfolio of covered call strategies in a single ETF.
- **Diversification:** Provides exposure to a diverse range of sectors and industries.
- **Cost-Effective:** The ETFs benefit from institutionally priced trading so that more of your money remains invested.
- **Management Expertise:** The portfolio managers have decades worth of expertise in the development and management of options strategies and the trading of options.
- **Flexibility:** Available in different currencies to suit your preference.
