ETC Group Physical Cardano

Reasons to Invest

An easy way to invest in Cardano

Unlike directly investing in ADA, RDAN needs no cryptocurrency wallet, unless investors wish to redeem RDAN for ADA. Your units of RDAN are safely held with your broker or bank.

Invest in Cardano on a regulated exchange

RDAN trades on regulated European exchanges e.g. XETRA, SIX. Investors can trade with confidence knowing that market participants are vetted and monitored, preventing market abuse unlike largely unregulated cryptocurrency exchanges.

Safe Custody

The ADA is stored with Coinbase Custody Trust Company, a secure, regulated custodian, built for digital assets. Strict KYC and AML standards ensure the provenance of all custodied cryptocurrency is vetted.

Fund Objectives

ETC Group Physical Cardano (RDAN) is an exchange traded cryptocurrency (ETC) that tracks the price of Cardano's native platform token ADA. Cardano is a blockchain built on a proof-of-stake consensus protocol that validates transactions without high energy costs. Each unit of RDAN ETC is 100% physically backed by Cardano's cryptocurrency ADA, and trades on European exchanges, providing investors with a safer and liquid way to gain exposure to ADA. Each unit of RDAN gives the holder a claim on a predefined amount of ADA. RDAN is issued by ETC Group and marketed and distributed by HANetf.

Key Risks

Investors' capital is at risk and investors may not get back the amount originally invested and should obtain independent advice before making a decision. Any decision to invest should be based on the information contained in the relevant prospectus. ETC securities are structured as debt securities, not as equity. Digital assets are highly volatile.
