AuAg ESG Gold Mining UCITS ETF

Reasons to Invest

Europes first gold mining ETF with an ESG conscious mandate

This is Europe's first opportunity to access an ESG considerate gold mining ETF.

Tracks 25 best-in-class ESG Risk companies in the sector

ESG screening excludes all but the 25 best-in-class ESG gold mining companies. The ESG Risk score is provided by Sustainalytics, who have over 25 years' experience producing ESG related research.

Equal weighting on index avoids concentration risks

Equal weighting helps avoid concentration risks typical of a market/liquid weighted index. The possible underweighting of dominant mega-companies may provide a beneficial return profile in a gold bull market.

Fund Objectives

AuAg ESG Gold Mining UCITS ETF (ESGO) seeks to offer exposure to an equal-weighted basket of 25 ESG screened companies that are active in the gold mining industry. The gold mining ETF tracks the Solactive AuAg ESG Gold Mining Index which focuses on companies that have low ESG risk characteristics. The fund uses Sustainalytics to screen the mining universe for their ESG credentials, attributing a risk score based on their findings. Only the top 25 lowest ESG Risk companies are included within the index.

Key Risks

Gold mining companies are highly dependent on the price of gold and may be adversely affected by a variety of worldwide economic, financial and political factors. The Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of gold mining companies. Investments related to gold are considered speculative and are affected by a variety of factors.Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means that the Fund may be more sensitive to any localised economic, market, political or regulatory events.
