Arrow Bitcoin EUR Hedged ETC

Key Features

Separating crypto conviction from currency

Hedging Bitcoin removes currency exposure, reducing the impact of EUR/USD exchange rate movements.

Long-term Bitcoin focus

Hedging Bitcoin provides an opportunity to express sustained Bitcoin conviction, reducing the noise created over long periods by currency fluctuations.

More predictable

A currency-hedged Bitcoin exposure may allow for Bitcoin allocations without having to take a separate view on currency markets.

Product Objectives

Arrow Bitcoin EUR Hedged ETC (EBTC) is designed to give investors exposure to Bitcoin while reducing the impact of currency movements against the US dollar. This is the world's first euro hedged Bitcoin ETP,[1] bringing a new currency hedged structure to the European crypto ETP market. Bitcoin trades globally in US dollars, meaning investors can be exposed not only to the price of Bitcoin, but also to movements in the dollar.
