YieldMax® Future of Defence Option Income UCITS ETF

Key Features

Defence option income

Options strategies can generate recurring income from defence companies by capturing option premiums, particularly when market volatility is elevated.

Diversified portfolio

Investing across defence, aerospace and cybersecurity companies may provide broader access to rising security spending and the long-term modernisation of military capabilities.

Income and growth

Maintaining direct equity exposure alongside an options strategy can provide a balance between income generation and participation in the long-term growth of the defence sector.

Product Objectives

YieldMax® Future of Defence Option Income UCITS ETF (NATY) is an actively managed fund that seeks to generate current income and capital appreciation through investments in a portfolios of companies with exposure to NATO and NATO+ ally defence, aerospace, and cyber defence spending. The fund seeks to generate income primarily by selling options contracts on its portfolio holdings, with the goal of distributing income on a monthly basis. NATY also seeks capital appreciation through direct equity investments.The fund manager evaluates potential holdings based on stock and options liquidity, price levels, and implied volatility, and regularly reviews the portfolio to determine whether to add or remove positions.

Key Risks

When you invest in ETFs your capital is fully at risk and may not get back the amount originally invested. Exchange rates can have a positive or negative effect on returns. The value of equities and equity-related securities can be affected by daily stock and currency market movements. For a complete overview of all the risks, please refer to the "Risk Factors" in the Prospectus.

** Source: HANetf/Bloomberg. The Distribution Rate is the annual rate an investor would receive if the most recently declared distribution, which includes option income, remained the same going forward. The Distribution Rate is calculated by multiplying an ETF's Distribution per Share by twelve (12), and dividing the resulting amount by the ETF's latest NAV on the annoucement date. The Distribution Rate represents a single distribution from the ETF and does not represent its total return.*
