The categorisation above is not guaranteed to remain unchanged and may shift over time.

The categorisation above (**6**) is due to the nature of the Fund's investments and risk associated with those investments, including:

- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Active Management Risk:** The Fund's assets will be actively managed by the Investment Manager and the Sub-Investment Manager who will have discretion (subject to the Fund's investment restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Fund's portfolio that would have been excluded or included had the Models and Data been correct and complete. Errors in programming, data entry, system compatibility, or database integrity can result in the unintended inclusion or exclusion of securities in the Fund's portfolio. Such errors, whether due to human or technological factors, could induce the Investment Manager or the Sub-Investment Manager to make investment choices that would not have been made with accurate and complete information, potentially leading to losses or missed gains for the Fund.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Tracking error risk:** The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.
- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
