Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Finamex Mexico S&P/BMV International UMS Sovereign Bond 5-10yr UCITS ETF (the Fund) ISIN: IE000UGM8X46

Accumulating ETF Share Class – MXN Hedged

A sub-fund of HANetf ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund seeks to track the price and yield performance, before fees and expenses, of the S&P/BMV Sovereign International UMS 5-10 Year Target Maturity 30% Capped Bond Index (the **Index**).

The Index is governed by a published, rules-based methodology and is designed to measure the performance of the United Mexico States fixed income market. Index constituents must be Mexican government securities issued outside of Mexico in US dollars with maturities between 5 and 10 years.

To be eligible for inclusion in the Index, constituents must meet the following criteria:

- be listed on regulated markets as disclosed in Appendix 1 of the Prospectus;
- have a maturity of between 5 and 10 years;
- the issuance time must be less than 5 years; and
- the par amount outstanding must be at least US$ 1 billion; and
- must always have a minimum of six constituent issues.

The Index constituent issues are capped at 30% of the total Index.

To minimise exposure to fluctuations in the exchange rate between the share class currency and the base currencies of the Fund's underlying holdings, the share class enters into foreign exchange transactions (typically FX forwards).

Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.

The Index is adjusted and rebalanced on a quarterly basis.

Replication: The Fund will employ a "passive management" (or indexing) investment strategy and will seek to employ a replication methodology, meaning as far as possible and practicable, it will invest in the fixed income securities in proportion to the weightings comprising the Index.

Dealing: Shares of the Fund (**Shares**) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income received by the Fund's investments will not be distributed in respect of the Shares of this class and instead income will be accumulated and reinvested on behalf of the shareholders of the Fund.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar. The share class currency is Mexican Peso

Risk and Reward Profile

1	2	3	**4**	5	6	7

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (**4**) is due to the nature of the Fund's investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Sovereign debt risk**: The Fund invests in securities issued by or guaranteed by non-U.S. sovereign governments and by entities affiliated with or backed by non-U.S. sovereign governments, which may be unable or unwilling to repay principal or interest when due. In times of economic uncertainty, the prices of these securities may be more volatile than those of corporate debt obligations or of other government debt obligations. Sovereign obligations may differ from other securities in their interest rates, maturities, times of issuance and other characteristics and may provide relatively lower returns than those of other securities. Similar to other issuers, changes to the financial condition or credit rating of a government may cause the value of the Fund's sovereign obligations to decline.
- **Geographical investment risk:** The Fund invests a significant portion of its assets in the securities of a single country or region and the Fund's performance is likely to be impacted by events or conditions affecting that country or region. Such events include but are not limited to political and economic conditions and changes in regulatory, tax, or economic policy.

- **Emerging Market Risk:** The Fund may invest in companies based in emerging markets which may involve additional risks not typically associated with other more established markets such as increased risk of social, economic and political uncertainty.
- **Currency risk:** The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund. Risks not covered by the indicator, but which are materially relevant to the Fund include:
- Tracking error risk: The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.
- **Liquidity on secondary market risk**: There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund. It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions. For a complete overview of all risks attached to this Fund, refer to the section entitled "**Risk Factors**" in the Supplement and the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0%*
Exit charge	0%*

Charges taken from the Fund over a year	
Ongoing charges	0.55%**

Charges taken from the Fund under certain specific conditions	
Performance fee	None

* Authorised participants dealing directly with the Fund may pay an entry charge up to a maximum of 5% and an exit charge up to a maximum of 3%. The Fund is currently not exercising its entitlement to apply entry and exit charges.

Since the Fund is an ETF, secondary market investors will not typically be able to deal directly with HANetf ICAV. Investors buying Shares on exchange will do so at market prices which will reflect broker fees and/or transactions charges and bid-ask spreads as well as underlying company prices at the time of trading on the secondary market.
* Authorised participants dealing directly with the Fund will pay related transaction costs. * For Investors dealing directly with the Fund, switching between sub-funds may incur a maximum switching charge of 3%.
** The ongoing charges are paid to the Manager which is responsible for discharging from its fee the cost of operating the Fund. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another investment fund.

Please see "**General Charges and Expenses**" and "**Management Charges and Expenses**" sections of the Prospectus and "**Charges and Expenses**" and "**Key Information for Share Dealing**" sections of the Supplement for further information about charges.
